

Dear Sir/Madam,

Invitation to “iAM Smart” Webinar for Accounting and Legal Sectors

It is my pleasure to inform you that “iAM Smart” Sandbox Programme (“Sandbox Programme”) has been opened to Accounting and Legal sectors. I write to cordially invite you to attend a webinar to learn more about “iAM Smart” (「智方便」) and the Sandbox Programme in preparation for adopting “iAM Smart” for the online services of your organisation.

“iAM Smart”

“iAM Smart” aims to provide all Hong Kong residents aged 11 or above with a single digital identity and an authentication function to conduct government and commercial transactions online. Hong Kong residents are free to register and use the “iAM Smart”. At present, there are more than 2.2 million “iAM Smart” registered users and the number has been on the rise. Over 290 government and commercial online services are now accessible through “iAM Smart”. Detailed information is available at the “iAM Smart” website (<https://www.iamsmart.gov.hk>).

Functionalities of “iAM Smart”

There are two versions of “iAM Smart” account, namely “iAM Smart” (via self-online registration) and “iAM Smart+” (via in-person registration at designated locations). Users can use “iAM Smart” online for authentication, “e-ME” form-filling and digital signing.

Authentication - Users can use “iAM Smart” to verify their identities to access various government and commercial online services in a simple and secure way without having to manage different user names and passwords of the online services. Online services providers could apply such authentication function in various use cases including account login without using user ID and password, identity verification for account opening/account activation, etc.

“e-ME” Form-Filling - Users can store general personal data (such as name, gender, phone number, date of birth, address data on utility bills, etc.) in their “iAM Smart” accounts to perform form-filling automatically, saving their effort in repeatedly filling in the same data for different applications.

Digital Signing (for “iAM Smart+” users only) - Users can sign digitally electronic documents or forms to handle legal documents and procedures online with conformance to the Electronic Transactions Ordinance (Chapter 553 of the Laws of Hong Kong).

“iAM Smart” Sandbox Programme

To facilitate online service providers to adopt “iAM Smart” for various types of online services, we have been working with Cyberport to operate the Sandbox Programme for public and private organisations to access to integrated testing environment to build proof-of-concepts using “iAM Smart”. Currently, online service providers are free to adopt “iAM Smart” for online services and they can access useful information on the Sandbox Programme website to expedite “iAM Smart” adoption for their online services.

Organisations which are interested in joining the Sandbox Programme may submit an application to the Cyberport. Details can be found in the Sandbox Programme website (<https://iamsmart.cyberport.hk/apply-now/>).

Webinar

To facilitate your organization to know more about “iAM Smart” and the Sandbox Programme, Cyberport and OGCIO will co-organise a webinar as follows:

Agenda
